Nevada Career Institute Now Enrolling for New Pharmacy Technician Program
Program Demonstrates NCI's Continued Commitment to Providing Quality Education

LAS VEGAS, Nevada—Nevada Career Institute (NCI) is once again expanding its programs for students by adding the Pharmacy Technician Program to its list of offerings. Classes are currently enrolling for this new program, which will offer the same dynamic learning environment NCI is so well known for.

“Bringing the Pharmacy Technician Program to Nevada Career Institute addresses a growing need in the community for well-trained Pharmacy Technicians,” explained Divisional Director of Operations Jeff Akens. “We are excited to be able to offer this training option to individuals who are hoping to enter the pharmaceutical field.”

From collecting prescription information to measuring medication and organizing inventory, Pharmacy Technicians are a vital part of the pharmacy and health care team. A growing aging population with a greater demand for prescription medications along with advances in pharmaceutical medicine all translate to an increasing demand for trained and licensed Pharmacy Technicians. The new Pharmacy Technician Program at NCI addresses this need directly, pairing in-class instruction with hands-on learning opportunities so students graduate with the practical skills they need to succeed in the field and enter the world of work.

“The Pharmacy Technician Program is yet another way NCI demonstrates its commitment to producing quality allied health professionals.” Akens shared. “We can’t wait to see the difference these graduates will be able to make within their communities through the excellent care and service they will be providing each and every day.”

Interested in learning more about the Pharmacy Technician Program or about Nevada Career Institute? Please contact Nancy Aguillon at NancyA@success.edu for more information.

About Nevada Career Institute

Established in 1993, Nevada Career Institute (NCI) is a leader in allied health education. NCI offers practical career-focused training programs designed to equip students for success. These programs include Medical Assistant, Dental Assistant, Surgical Technologist, Medical Insurance Biller and Coder, Business Office Administration, and Pharmacy Technician. Students can also choose to earn their Associate degree through the College's Associate of Science in Healthcare Administration Program.

Nevada Career Institute's programs bring together rigorous classroom studies with hands-on training—allowing students to put their newfound knowledge into practice. NCI students graduate ready to hit the ground running as they make a difference in their surrounding communities. Accredited by the
